Cleaver RANN SCIENTIFIC B

Three wavelength options: 254/312/365 nm - two dual wavelength models

- Long life filter
- High efficiency reflector
- Hi/Lo intensity switch
- Fast start up

Available in single and dual wavelength formats, in 21x21cm and 21x26cm sizes, EZEE transilluminators are supplied either as standalone units or with the microDOC, as part of a fully integrated gel

With a large surface area, each transilluminator serves as the perfect workstation for viewing and working with fluorescently-stained protein and nucleic acid gels.

Standard features include a high/low intensity safety switch and an efficient starter that allows each of the six 8-Watt UV tubes to energise quickly without flickering, while special filter glass minimises unwanted background light. All of these features maximise contrast and sensitivity, allowing even the faintest fluorescent gels to be viewed. Two dual wavelength models offer added flexibility and convenience.
